

# ROBOT POS

**ROBOT POS** is specially designed for the retail and hospitality industries. Dependable, reliable, with high transactions throughput, and a stylish, yet rugged form factor. More than just a computer, the Senor **ROBOT POS** is perfectly designed for the point-of-sale. Senor has engineered many patented and proprietary features into **ROBOT POS** such as:

- An infinitely, motorized tilting LCD Touch Screen for high screen clarity and ergonomic positioning of the Touch Screen.
- A specialized high performance power supply, with the extra power needed to supply most peripherals, thus reducing the need for extra power blocks.
- Display media and messages on a *DUAL* screen facing the customer. Ideal for advertising and promotional messages.
- And the world-renown Senor engineering excellence.

You can look forward to years of high quality performance because **ROBOT POS** is perfectly built for the point-of-sale . . . built to last . . . and built to perform.
