

SE^NMOR - POS to Perfection

SCAN POS is ideal wherever barcode scanning is a requirement - supermarkets, convenience stores and general retailing. **SCAN POS** is also ideal for automatic price checking kiosks; and for product information systems in record and video stores where it allows playback of music samples and video promotions when a customer scans the product barcode.

- An infinitely motorized tilting LCD Touch screen for high screen clarity and ergonomic positioning of the touch screen.
- A specialized high performance power supply, with the extra power needed to supply most peripherals, thus reducing the need for extra power blocks.
- Display media and messages on a *DUAL* screen facing the customer. Ideal for advertising and promotional messages.
- And the world-renown Senor engineering excellence.

You can look forward to years of high quality performance, because **SCAN POS** is perfectly built for the point-of-sale . . . built to last . . . and built to perform.
